Comprehensive dynamic analysis of complex web applications & services

About Fortify WebInspect from Micro Focus

Micro Focus Fortify WebInspect is an automated dynamic application security testing (DAST) solution that mimics real-world attacks to detect critical security vulnerabilities in running applications.

Micro Focus Fortify WebInspect Benefits
- The industry's most mature dynamic web application testing solution, with the breadth of coverage needed to support legacy and modern application types.
- Meet security compliance standards with pre-configured policies and reports for major compliance regulations, including PCI DSS, DISA STIG, NIST 800-53, ISO 27K, OWASP, and HIPAA.
- Scan basic APIs in seconds with support for OpenAPI (Swagger). Access ScanCentral DAST, a centralized platform that allows you to run thousands of scans, giving dev teams the ability to run dynamic scans on their own.
- Leverage support for dynamic analysis at scale with key features such as automatic macro generation, Selenium support, and containerization.
- Leverage prebuilt scan policies, or build your own policies.
- Use incremental scanning to rapidly assess vulnerabilities in changed areas of the application, or leverage QA scripts for highly targeted scanning.

Find and fix exploitable web application vulnerabilities with automated dynamic application security testing (DAST).

What customers are saying:

“Gamania now uses WebInspect to run a monthly fixed scan looking for web page security weaknesses. There is an almost 100% accuracy rate and the software instantly adjusts firewall settings, thereby automating security management.”

– Gamania
Why Azure?

**Be future-ready**
Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

**Operate hybrid seamlessly**
On-premises, in the cloud, and at the edge—we’ll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

**Build on your terms**
You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

**Trust your cloud**
Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
