End-to-end data encryption across enterprise, cloud, mobile, & big data

About Voltage SecureData Enterprise

Secure sensitive data wherever it flows—on premises, in the cloud, and in big data analytic platforms. Voltage encryption delivers data privacy protection, neutralizes data breach, and drives business value through secure data use.

Micro Focus Voltage SecureData Benefits

- Enables enterprises to de-identify sensitive structured data and support the use of data in its protect state to safely drive business value.
- Comply with global regulations, including GDPR, CCPA, and HIPAA.
- Ensure that applications operate on secure data flowing through the enterprise with no gaps, no decryption, and no performance overhead.
- Gain cloud benefits and keep control of “crown jewel” data assets and keys with persistent encryption.
- Encrypt sensitive data in analytics platforms and data lakes in the cloud and on premise, to increase access to data for faster insights and innovation.
- Cut up to 85% of PCI DSS audit scope and costs and reduce breach risk.

What customers are saying:

“We were able to get PCI compliant, which is a very big win for us, and improve our security and the additional controls around the data as it’s being moved, and we have very few support calls.”

– Director of Enterprise Security, AAA-Auto Club
Why Azure?

Be future-ready
Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly
On-premises, in the cloud, and at the edge—we’ll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms
You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud
Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
