Solution Attached Services for Cisco Duo

Accelerate your Zero Trust journey with enhanced phishing and identity threat protection
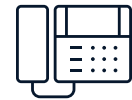

Unparalleled observability

Secure experiences

Unlock insights

Build digital resilience

Outcomes

- **Simplify:** Save time and resources by deploying Cisco® Duo quickly and easily, minimizing downtime and optimizing productivity.

- **Reduce Risk:** Gain expertise to help you deploy and adopt Cisco Duo.

- **Transform:** Boost agility and unlock the business outcomes you want.

Traditional Identity and Access Management (IAM) has failed to keep us safe. Attackers are bypassing Multi-Factor Authentication (MFA), and identity-related attacks are rampant. Identity is too important to be an afterthought.

Cisco Duo provides the only security-first IAM solution built to protect organizations from modern identity threats. With strong, deployable, and user-friendly security, Cisco Duo is redefining and restoring trust in identity.

Solution Attached Services (SAS) for Cisco Duo is designed to meet your organization's unique needs, ensuring a significant return on investment and enhanced security posture.

Our seasoned experts work together with you year-round to accelerate the adoption and adaptation of your security strategy and counter the latest threats. We provide expertise, consulting, and hands-on keyboard implementation that streamlines onboarding, migration, adoption, and optimization and helps you maintain a robust, responsive security posture that evolves with today's dynamic threat landscape.

Why Solution Attached Services for Cisco Duo?

- See faster time to value with expert project management and deployment.

- Leverage our deep domain expertise in securing access with Cisco Duo.

- Reduce effort and risk with Cisco expertise, processes, and tools.

- Accelerate outcomes using Cisco best practices and industry-leading automation.

- Enjoy flexible engagement models tailored to your preferred workstyle.

Engagement options

- Advise Me: You need expert guidance to complement your in-house technical skills.

- Do It With Me: You need technical training and expert guidance to complement your execution capacity.

- Do It For Me: You need direct, hands-on keyboard implementation by Cisco experts to deliver on your goals.

Let Cisco experts advise you, work alongside your IT experts and partner teams, or direct and manage the engagement.

Seamlessly integrate and adopt Cisco Duo

Solution Attached Services for Cisco Duo offer year-round expert consulting and implementation services engagement designed to mitigate deployment risks and help you maximize the full value of your Cisco security solution.

Our specialists work with you to mitigate risks, accelerate adoption, and maximize the full value of your Cisco security investment.

With our tailored expertise, you can:

Establish secure access to critical applications.

Consolidate identity tools.

Meet compliance requirements.

Apply granular, context-based access policies – strengthening security without disrupting the user experience.

These services deliver comprehensive lifecycle support for testing, validation, migration, and implementation of Cisco Duo, ensuring seamless integration into your existing security framework.

Our specialists thoroughly assess your processes, technology, and security posture to provide strategic recommendations and tailored, hands-on implementation, while also empowering your teams with practical knowledge transfer. Detailed reporting gives you actionable insights into how Cisco Duo drives your business goals and enhances agility, helping you maximize value and ensure a smooth rollout.

Whether you're building phishing resistance, implementing security-first IAM, or unifying identity intelligence, our experts help you achieve your organizational goals – strengthening your security, your resilience, and your overall workplace experience.

Deliverables customized to your unique business requirements

For illustration purposes, the chart below provides an example of what a 12-month quarterly services plan for Cisco Solution Attached Services might include. Once you have purchased the service, your Cisco team will work with you to identify your technical and business goals and objectives and develop a plan of action tailored to your unique requirements. Solution Attached Services apply only to specific Cisco solutions or architectures – in this case, Cisco Duo.
