

GIS Mapping Overview

GIS Mapping

My Quorum GIS combined with Esri ® ArcGIS native capabilities open up a world of information for the entire Land Management lifecycle. By combining interactive mapping with a single source of truth for land management, your entire company gains insight into your most important assets.

GIS is a huge plus for our company. The ability to view all of your leasing activity on the map and map out lease boundaries is very important to our business.

- Arcadia Operating, LLC

See, Analyze, and Understand

- Get real-time spatial analysis of land assets online, from any device.
- Map leases automatically based on legal descriptions and aliquots.
- Jump to agreements in My Quorum Land via seamless integration.

Best-in-Class Functionality

Move away from outdated software that falls short on functionality and integration. Trust the land leader to better your business.

Web-Based Access

Analyze and share information online, from any device.

Spatial Filtering

Analyze acreage for a defined area using spatial filter tools.

Automated Mapping

Generate GIS tracts based on legal descriptions and aliquots.

Data Layers

Turn data layers on and off for more specific analysis.

Map Search

Locate a lease, well, or project area on a map with an intuitive search.

Land Integration

Jump to specific agreements in My Quorum Land for further analysis.

Map Polygons

Map polygons with spatial data creation for PLSS, Texas, Tax Parcel, and more.

Data Export

Print maps, and export data to share across the company.

Powered by Esri

Leverage ArcGIS extensions from the industry standard for mapping.

My Quorum applications are built with 20+ years of industry expertise and experience to empower users by simplifying tasks, automating work flows, and improving their accuracy, speed, and productivity. Mobile first and cloud enabled, My Quorum applications are available in the office or in the field, whenever and wherever they're needed.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
