

Land Acquisition Overview

Land Acquisition

Create real-time connections between land professionals in the field and your department. My Quorum Land Acquisition is web based with built-in workflows that enable landmen to quickly acquire, map, and record lands with comprehensive detail.

At a former company, I was thrown into Quorum with little training, but it was so easy to use that I practically taught myself.

- White Rock Oil & Gas

Create Real-Time Connections

- ◇ Save time by establishing ownership and tracking all project details online.
- ◇ Leverage built-in workflows to easily review and approve agreements and payments from brokers.
- ◇ See the status of your acquisition projects in real time with integrated GIS mapping.

Best-in-Class Functionality

Move away from outdated software that falls short on functionality and integration. Trust the land leader to better your business.

Agreement Capture

Acquire, map, and record lands with comprehensive detail.

Expedited Approvals

Automatically generate, review, and approve lands and payments.

Data Sync

Never retype values with seamless data sync to My Quorum Land.

Title Management

Manage title with integrated workflows to organize and reuse data.

Broker Review

Assign brokers tasks and measure quality and cycle time at each step.

Integrated GIS

Analyze leasing activity in real time with integrated GIS powered by Esri®.

File Upload

Attach all land files, assignments, and images associated with a land.

CRM Workflows

Track lessors' names, negotiation notes, and remarks in one location.

Ad Hoc Reporting

Create reports and visualize data to fit specific business needs.

My Quorum applications are built with 20+ years of industry expertise and experience to empower users by simplifying tasks, automating work flows, and improving their accuracy, speed, and productivity. Mobile first and cloud enabled, My Quorum applications are available in the office or in the field, whenever and wherever they're needed.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
