

# Best-in-Class Well Lifecycle Reporting

A complete solution to help you report, analyze, and improve reporting.

On Demand Well Operations is a complete well lifecycle reporting solution to help you capture field activity and costs, distribute daily reports and perform operational analysis. Simply login from anywhere to manage your operations. It's proven to help companies reduce time spent collecting field data, understand well costs sooner, and grow their operations without increasing overhead.

## Product Features

### Collect Better Data

Field-friendly interface that lets users focus on operations and not software.

### Automate Daily Reports

Setup any report to send to individuals or groups on a specified cadence.

### Track Vendor Performance

Cost and NPT reporting by vendor to hold everyone accountable.

### Prevent AFE Overrun

AFE vs. Field Cost and monthly accrual reporting to know when and why a project goes over budget.

### Build a Master Well File

Store all activity reports, permits, HS&E docs, and any other associated files in a single place.

### See the Well History

Organized and detailed wellbore information over the life of the well.

### Keep Partners Informed

Easily and automatically share approved data with stakeholders.

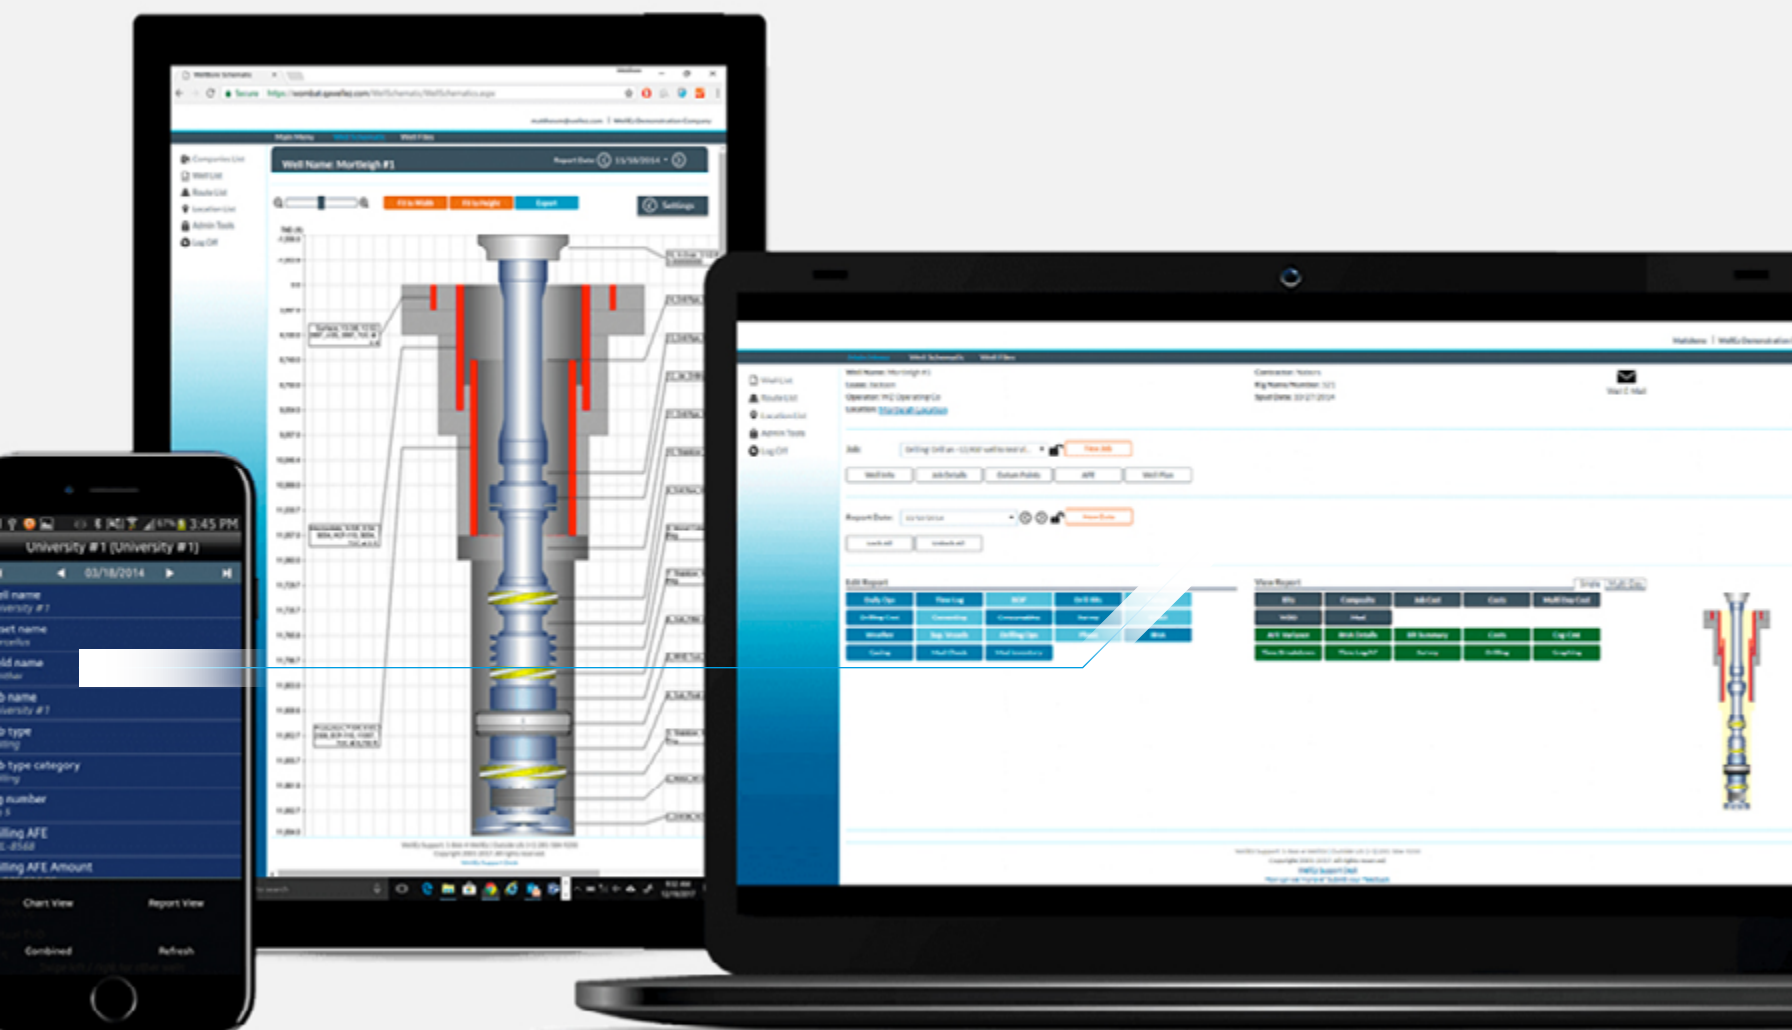

### 24x7 Support

Call us anytime day or night and get a real person who can solve your issue.

### Flexible Reporting with BIOD

Perform post-well & operational analysis to improve efficiency with On Demand Business Intelligence.

## Benefits

### Safety, Security and Experience

As the first cloud based and SOC2 compliant well operations software, our solution provides experience and peace of mind to operators making the shift.

### You Own Your Data

Our solution makes dealing with divestitures easy and does not hide or restrict it behind licenses or proprietary files.

### Consistent Reporting

Deliver the right information with less time and effort to all the project stakeholders collecting, correcting, and formatting data.

### Greater Visibility Into Field Costs

See detailed field costs versus AFE reports to catch budget oversights sooner and make a better decision on the next project.

### Affordable Subscription Model

Know your true total cost of ownership without overspending. Pricing is based on operational activity and upgrades are always included at no cost.

### Superior Customer Support

Our Customer Success provides O&G industry experts that exceed NPS, and CSAT benchmarks every year.

For more than 20 years, On Demand Well Operations has set the standard with cloud-based technology, scalable subscription pricing, and an easy-to-use application. Get up and running with software that scales with your business as it grows.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
