Integrated Land Management in the Cloud

Streamline land management processes and maximize oversight

Account for every acre at any depth with flexible, tract-based analytics designed for the unconventional era. Provide unlimited visibility to the C-suite and casual users alike with intuitive search, maps, and reports.

Product Features

Custom Forms and Fields

Create your own data fields and forms that instantly show up in reports.

In-App Mapping

For visualizing your data, users can easily create map reports and based on custom fields style layers as desired.

Universal Search

Intuitively search for all your land data using keywords or any other data attribute.

Notes and Calendar

Notes feature allows users to track lease provisions and obligations. Notes with due dates are integrated with in-app calendar-view of obligations with automatic email alerts.

Document Management

Store and link documents to any form in the application. Take advantage of automatic OCRing whenever a document is imported or searched through universal search.

3D Tract Modeling

Models the mineral estate that connects title, lease records, DO, and decks.

Reporting and BI On Demand

Easy to use, drag-and-drop in-app reporting that is also integrated with Power BI and templates to customize reports to your needs.

Mass Import

Quickly mass import all your data through Excel. This facilitates land acquisition process when users are onboarding in a single point of time.

Benefits

Scalable Software

With On Demand Land, customers can personalize their accounts with customizable templates, use user-defined provision and obligation tracking, and model any type of agreement or asset at scale.

Enhance Security and Lower Costs

Deploy accounts in seconds with zero IT costs or involvement. It's accessible anywhere, anytime and you can protect customer data with enterprise-scale security and backup protocols.

Fully Integrated

Includes all the tools land teams need in one fully integrated application. On-Demand Land customers operate more efficiently and accurately by relying on a single source of truth for ownership stakes, well decks, obligations, payments, and more.

Easy Transition

Land system conversions are no longer a nightmare. On Demand Land importer tools make it a cinch to lift and shift huge amounts of data, documents, and maps from legacy land systems into your On Demand Land account.

Improved Decision Making

Account for every acre with flexible, tract-based analytics for the unconventional era. Provide unlimited visibility to the C-suite and casual users alike with intuitive search, maps, and reports.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
