

Why Leading Oil & Gas Companies Use TESTit & PROVEit

We Help Clients to:

1. Standardize Field Data Capture

- ◊ Flexible off-the-shelf functionality to customize workflow to your company's SOP while maintaining industry standards
- ◊ Use a single common platform with user configurable tools that can be leveraged across simple or complex asset & regional needs.
- ◊ Support for US and Metric (SI) units in a single application.

2. Centralize Data for a Single Source of Truth

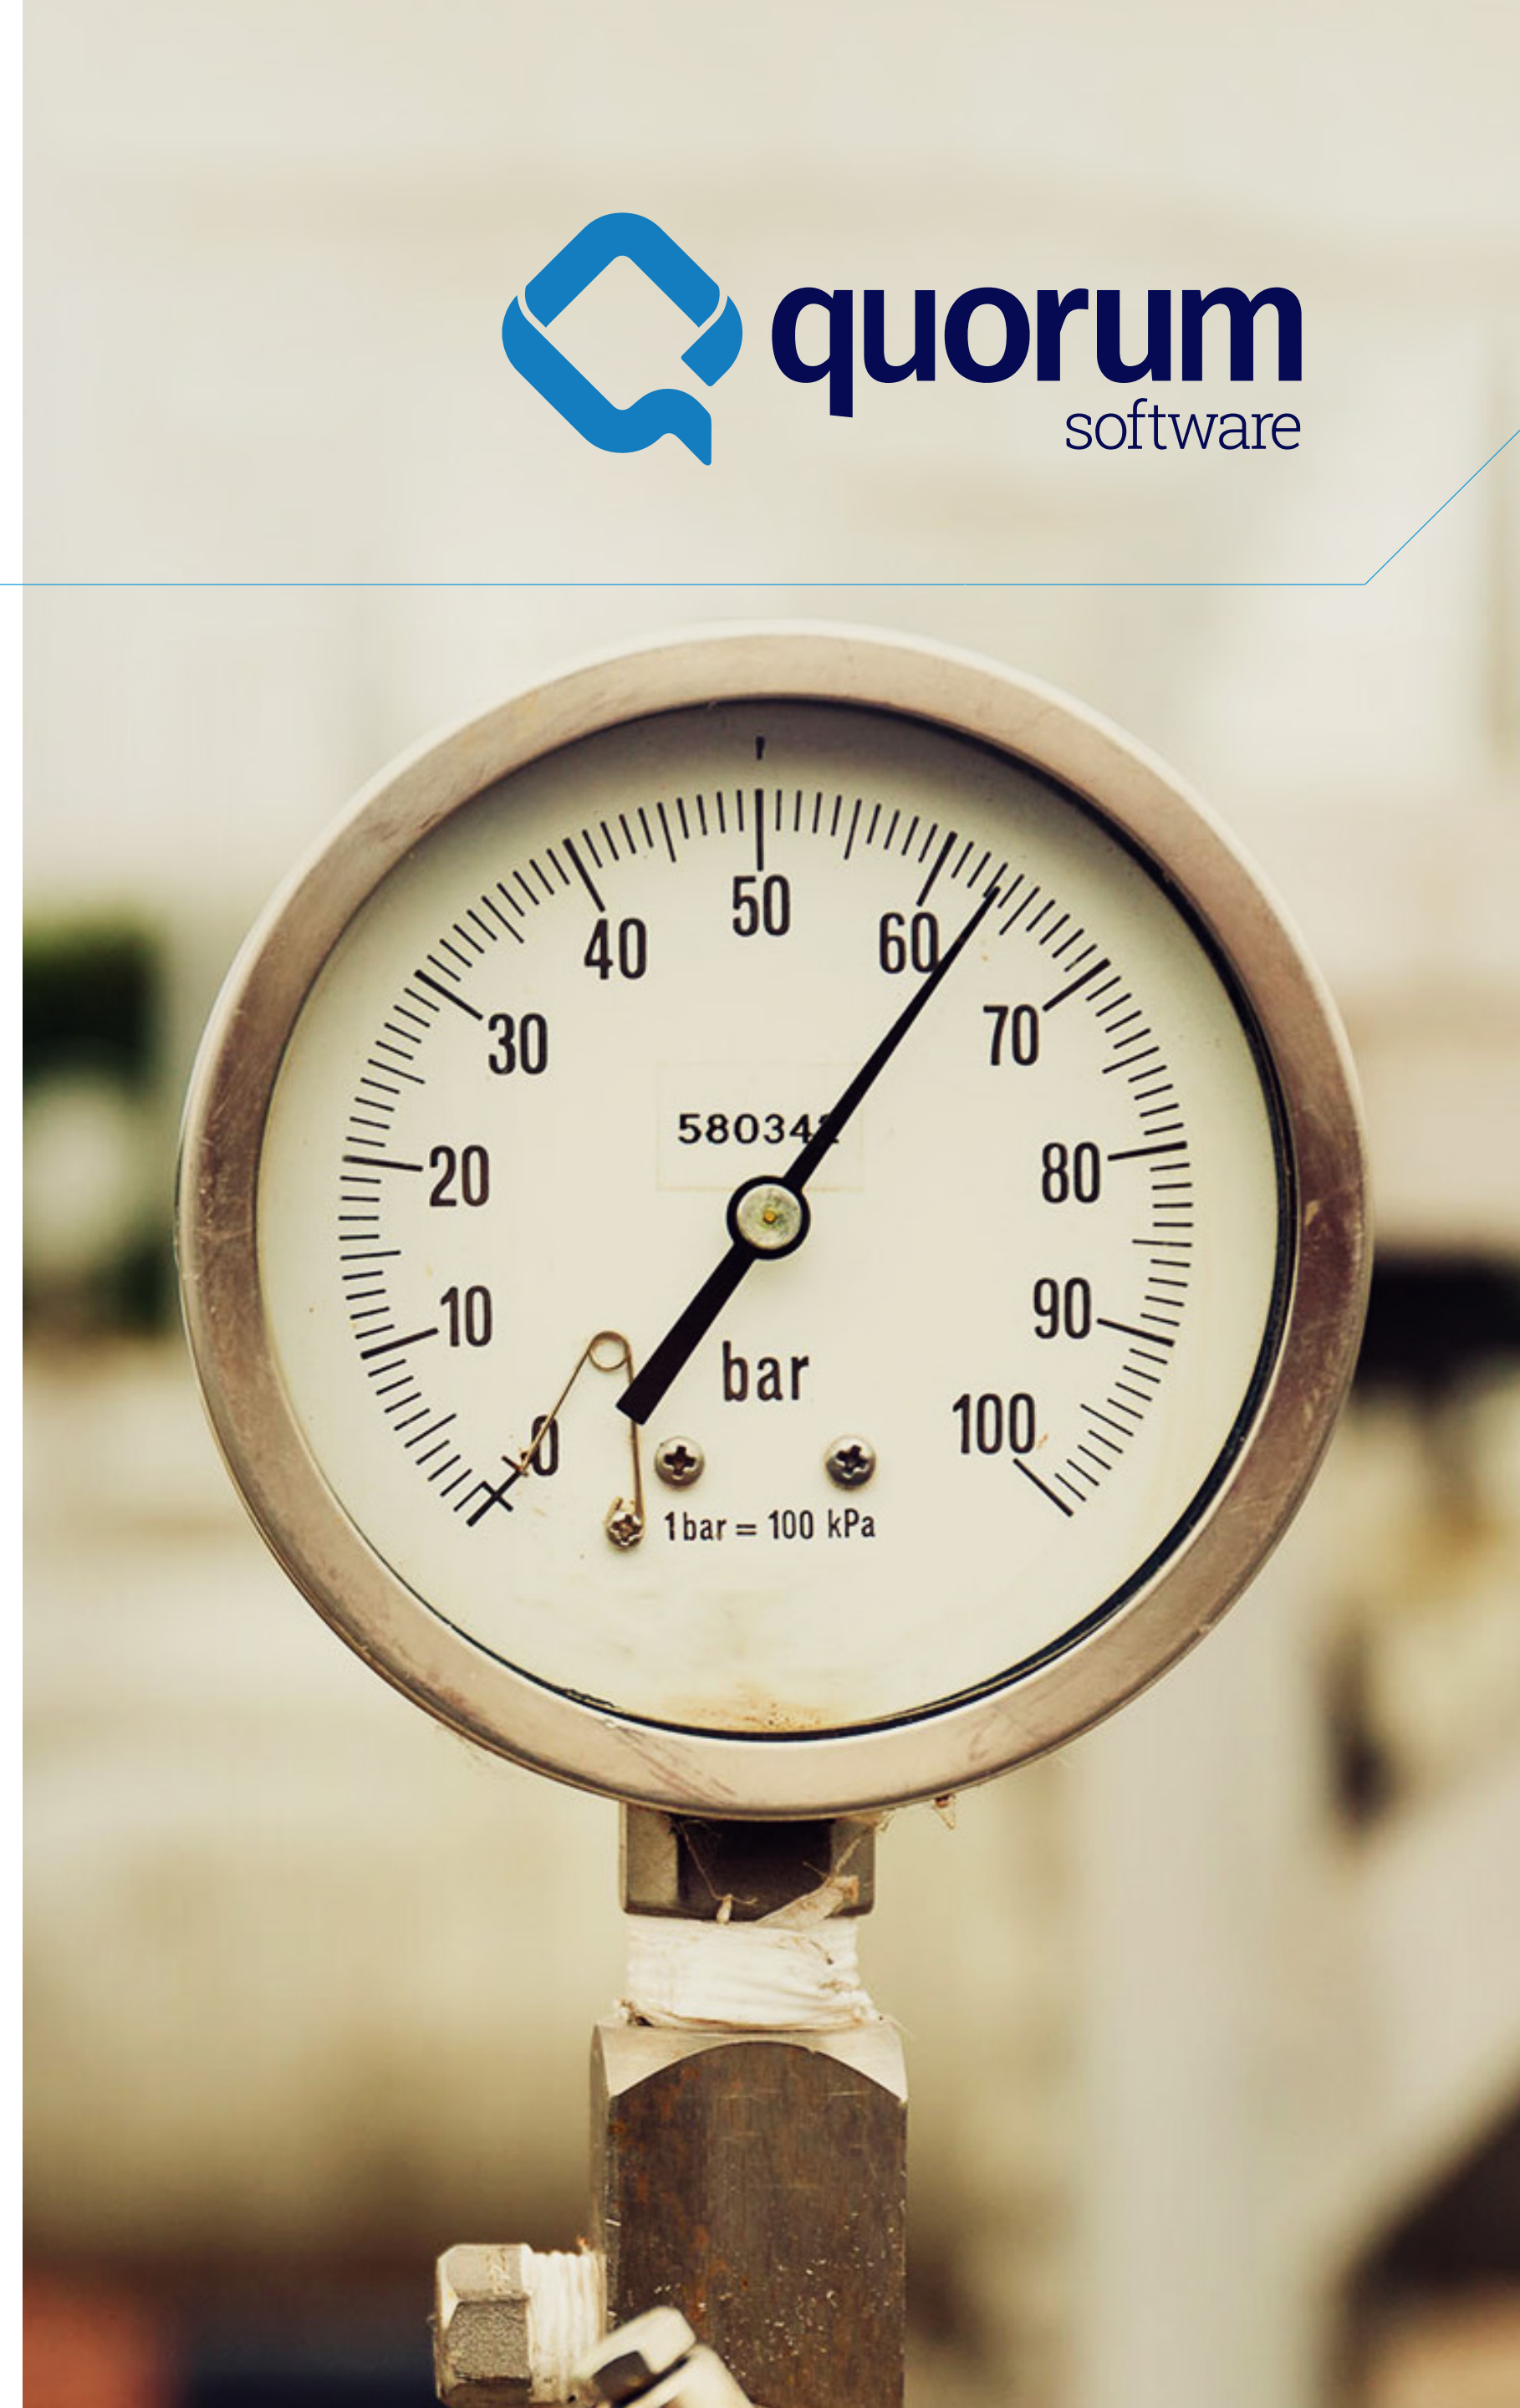

- ◊ Keep all calibration, proving, and certification reports in a single location for operations, back-office accounting, and financial needs.
- ◊ Control all team, asset, regional scheduling technicians from one tool
- ◊ Track, trend, and report data for compliance internally and externally.
- ◊ Retention of full pass detail on all prove reports.

3. Automate Distribution of Data

- ◊ Set up task-based characteristics.
- ◊ Improved import & export controls for calibration report distribution needs.

4. Validate & Make Real-Time Decisions

- ◊ Approvals and exceptions available to identify test data that is outside of the parameters defined in your SOP and contracts.
- ◊ Simplified meter & prover creation tools with unique identifier tools.
- ◊ Ability to recalculate data on the fly.

TESTit

Manage gas and liquid meter inspection and calibration results, testing and sample schedules, and conduct field calculations for flow rate and equipment sizing.

PROVEit

A comprehensive and integrated software package used to prove, track, and manage meter performance data based on the American Petroleum Institute's Chapter 12.2.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
