

Integrated Corporate Planning, Economics, Strategy & Reserves

Make Better Decisions Based on Data You Can Trust

Planning Space is the only corporate planning platform specifically designed to solve the complexities and challenges of planning in the modern energy industry—leveraging the power of the cloud to help energy companies make better decisions in less time, with the certainty of trusted and accurate data.

Business Planning

Capture opportunities, build business plans, analyze scenarios, and track progress against business goals. Planners can create detailed scenarios that explore the best investment options for a wide range of complex energy businesses. With Planning Space's dynamic planning philosophy, cumbersome planning cycles are a thing of the past, allowing users to maximize productivity and focus on value-added activities.

Strategy & Decision Analysis

Gain clarity and insight around strategic business questions, evaluate trade-offs, manage uncertainty, and strengthen your strategic planning process. Accelerate decision analysis with Planning Space's unique optimization engine to rapidly align on a path forward. Maximize the value of assets within the real constraints of the business such as debt limits, cash-flow targets, capital constraints, net-zero emission goals and more.

Economic Modelling & Evaluation

Evaluate complex tax situations with company or country level tax recalculation. Evaluate several assets in the same PSC with shared cost recovery and profit oil. Model situations where assets share facilities and have common economic limits. Use the library of existing fiscal models, create your own using the native and intuitive modelling environment, or utilize Excel to model the logic.

Integrated Reserves Management

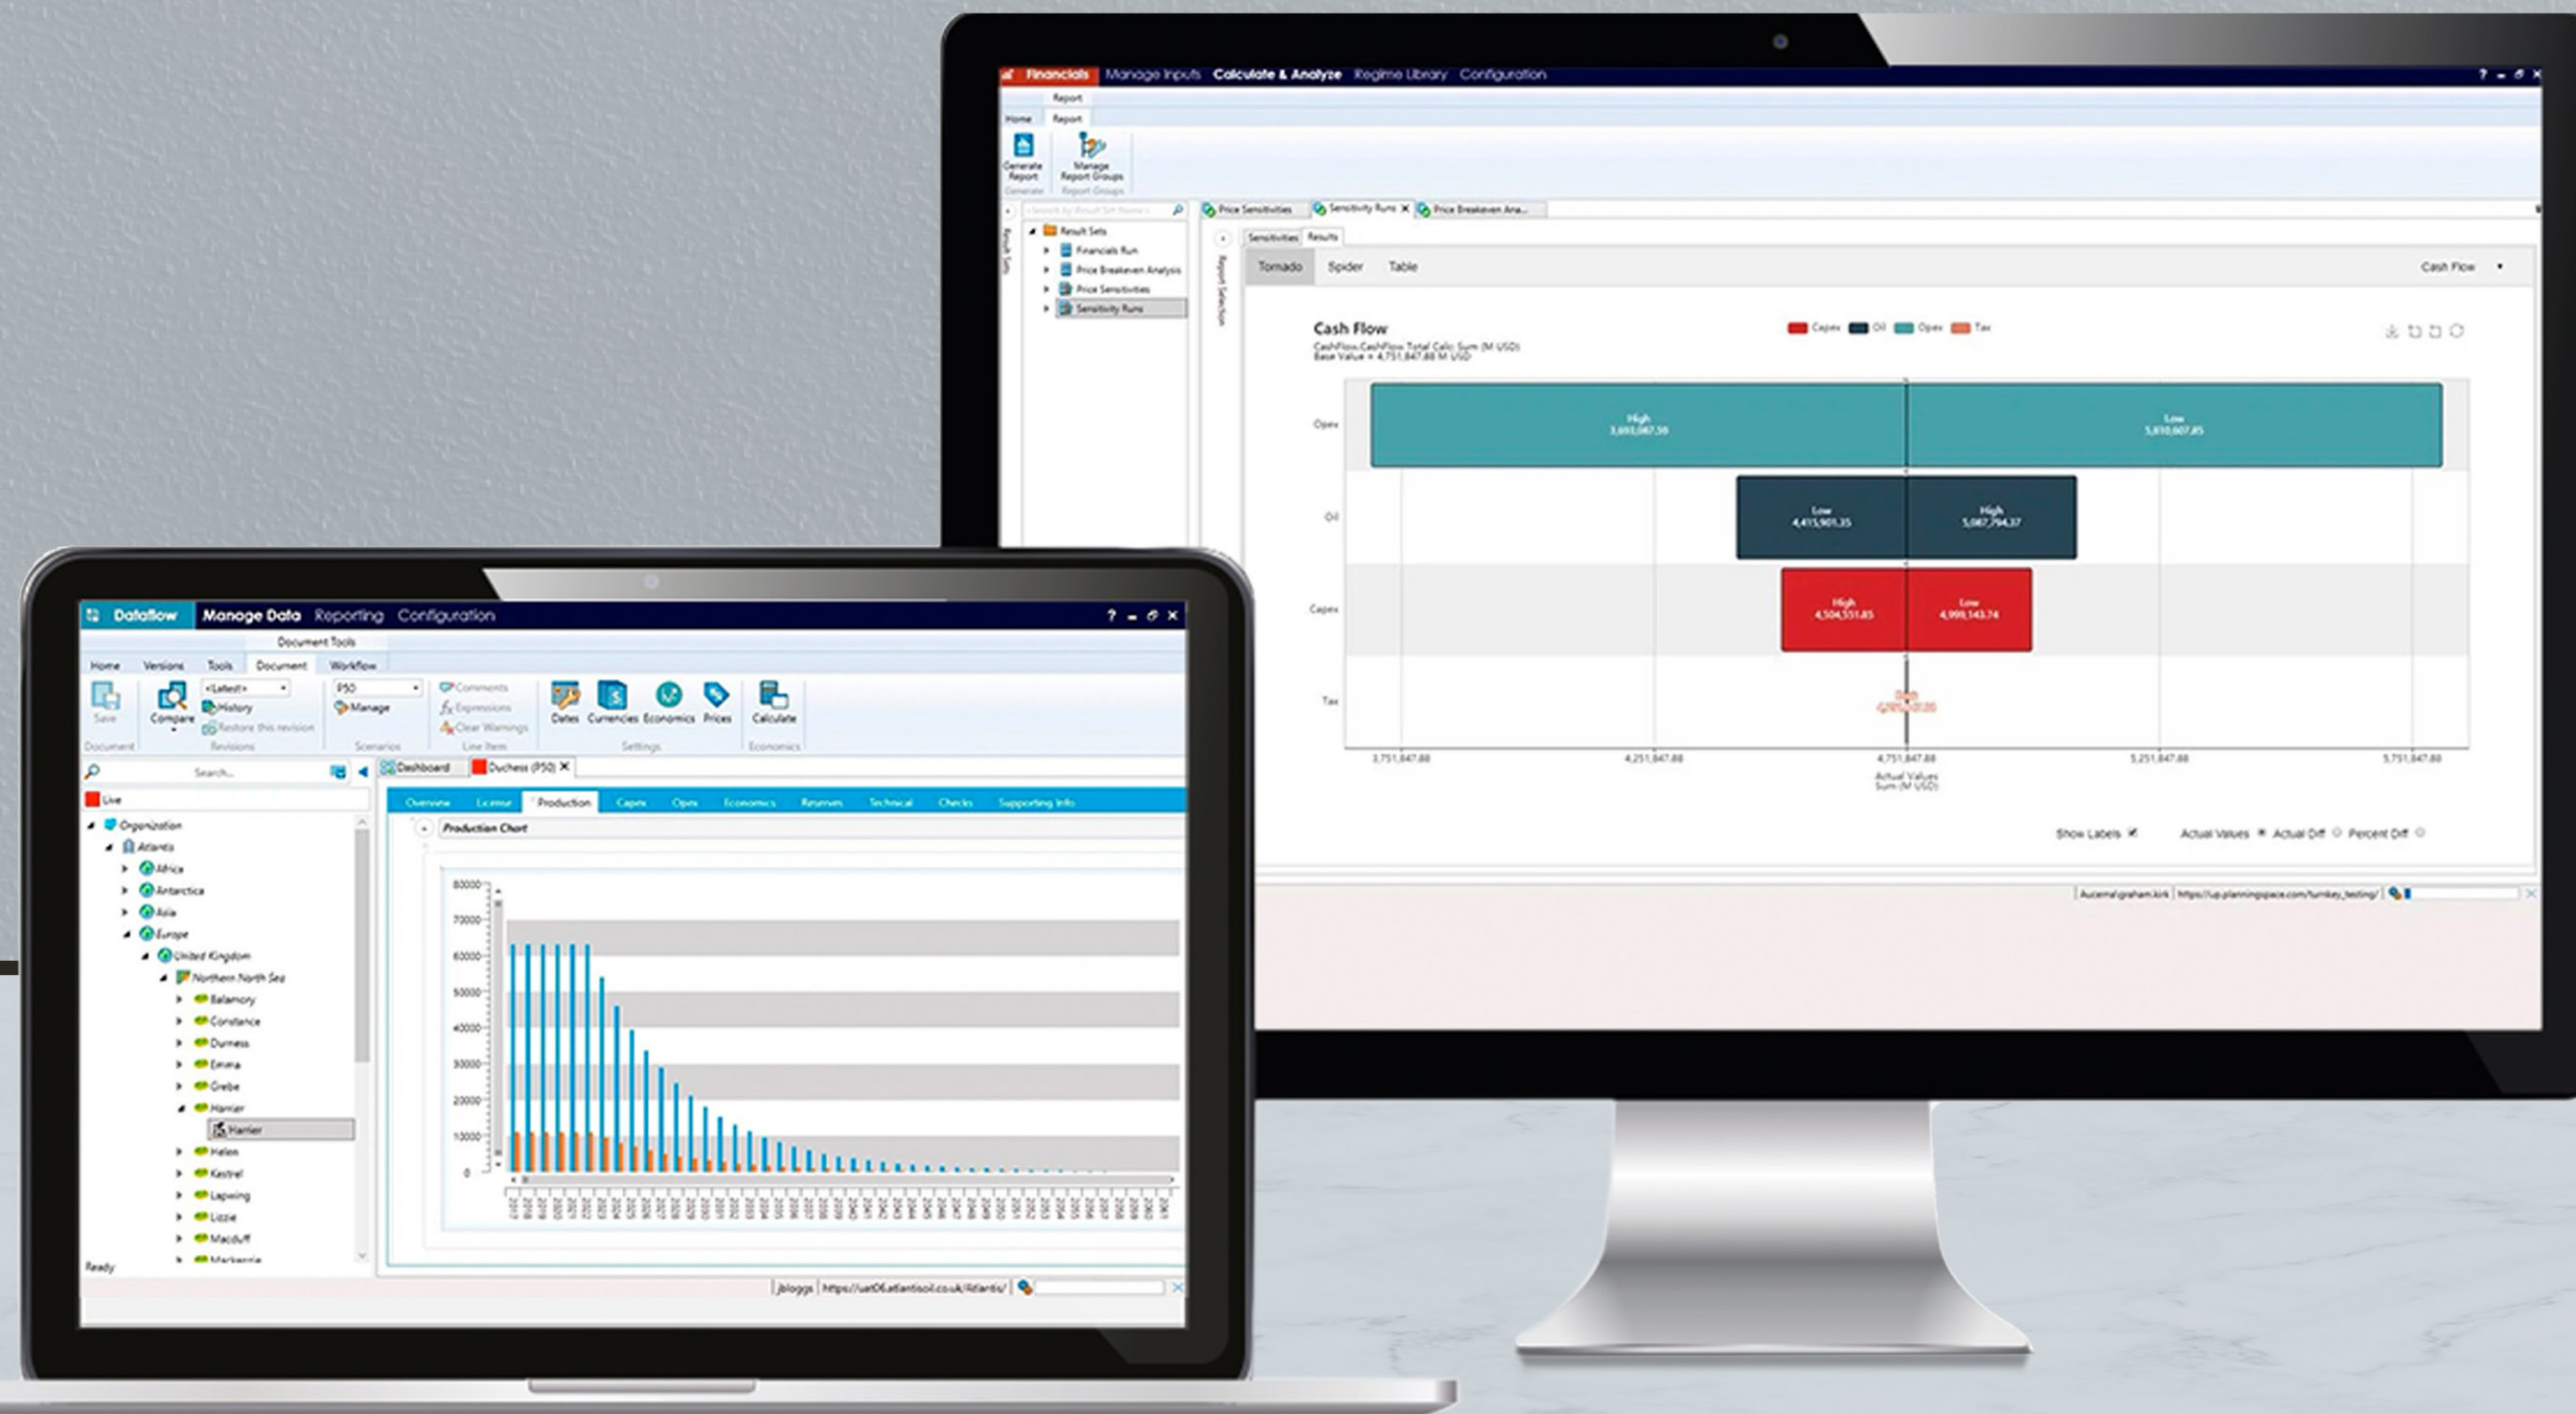

Fit for purpose corporate reserves management system for operators with complex operations and reserves management workflows. The system is source agnostic, capturing reserves and resource estimates from multiple sources across the organization to paint a complete picture of corporate reserves. It provides operators with comprehensive and flexible reserves workflows, analysis and reporting

Financial Planning

Harmonize economic outlooks with financial forecasts to analyze funding options, impacts to share price, and create pro-forma financial statements to look at financial KPI's.

Seamless Integration

Enhanced integrations between modules streamline corporate workflows, with open APIs providing integration opportunities with other products in the Quorum Energy Suite and external third-party tools.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
