Integrate and Automate Utility Processes

my quorum®

Streamline and automate critical oil and gas workflows across upstream and midstream with an all-in-one solution

My Quorum LDC Management

Combine gas supply, transportation, storage, and retail choice management in one integrated solution for local distribution companies. With a mobile-friendly, personalized experience for end users, My Quorum enables utilities to achieve more in less time.
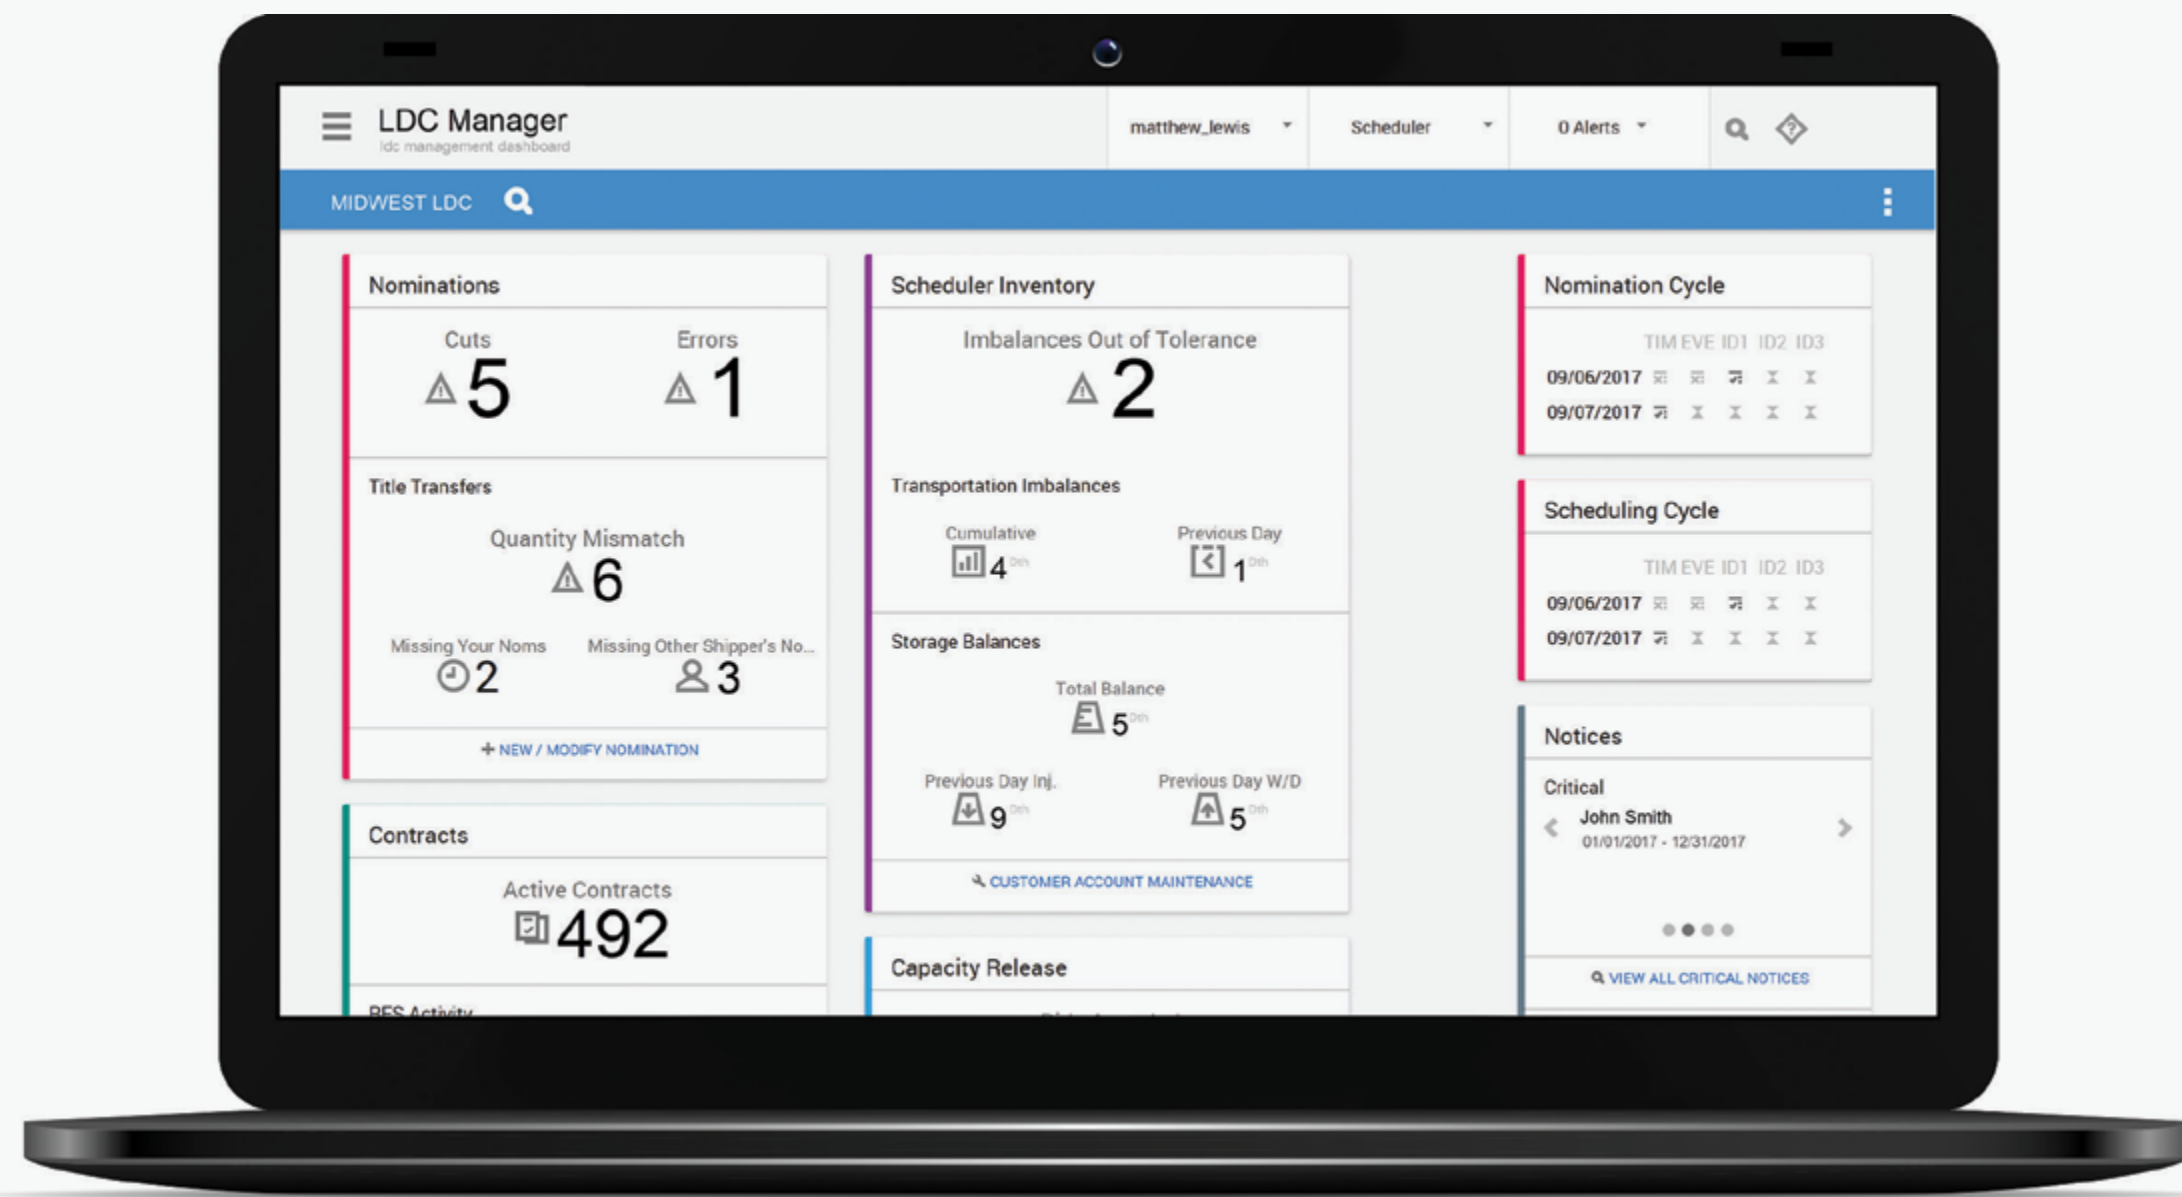

Efficiency, Control, Success

- Reduce risk with better visibility into changing supply and load dynamics.

- Simplify, automate, and optimize complex business processes.

- Minimize risk and ensure compliance with a complete audit trail.

Optimize Delivery and Distribution

Ensure the needs of suppliers and customers are being met with complete visibility into the acquisition-to-distribution lifecycle.

Analytics
Gain intelligent supply management enabled by analytics and modeling.

Scheduling
Access final scheduled quantities and allocations in the acquisition dashboard.

Nominations
Automate the submission of nominations from the supply-totransportation module.

Customer Activity Website
Enable external users to manage all of their transactions and reporting.

Imbalance Management
Capture, track, and report imbalances across transportation contracts.

Contract Administration
Simplify contract and confirmation processes with automated delivery.

Settlements
Streamline settlement processes, including GL, profit/loss, and cash flow.

Interoperability
Leverage standards-based information exchanges and 3rd-party integrations.

Cloud
Improve infrastructure flexibility and security with hosted and managed service offerings.

Quorum Software powers growth and profitability for energy businesses by connecting people, workflows, and systems with decision-ready data.
