

UNCOVER THE WRENCH TIME MYSTERY

Revolutionize the Way You Manage Contractor Workforces

MCI's Track and Triax combined their tech to expose wasteful workflows with automation. They recorded a \$32.45 million turnaround and discovered that 46.08% of labor was spent in non-productive areas. Lack of equipment, poor trade sequencing, and bad kitting are just some of the issues that caused these bottlenecks. See how it all broke down.

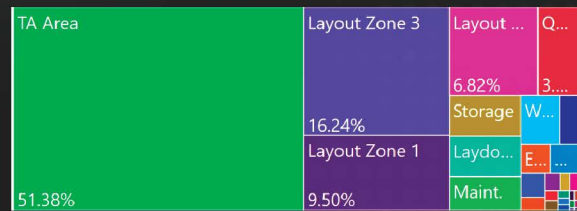

Non-productive Ratios

Non-productive Costs

Non-productive Zones

Automated Spend Management

MCI's TRACK Platform provides digital automation for tracking and management of contractor labor, equipment, and materials costs – with proven savings of up to 15%.

Building Connected Worksites

Powered by wearables, Triax transforms industrial visibility. Our interactive zoning technology provides a deeper level of activity monitoring for your site while protecting worker privacy.
