

BRIDGING THE GAP BETWEEN OWNERS & CONTRACTORS

Contractors have their hands full—from maintaining accurate records of time and attendance to processing payroll and billing. Delays in generating accurate invoices can impact cash flow for both contractors and clients. They need tools to streamline manual timekeeping processes and eliminate reactive audits.

Adopting any new software tool can seem like a bridge too far, as contractors fear the learning curve will be steep and time-consuming. However, the myTrack Platform is a win-win for contractors and owners in any industry. Instead of resistance and pushback, contractors who adopt myTrack find the benefits far outweigh any perceived misconceptions about the software's usability and impact on their operations.

Let's take a closer look at the problems the myTrack platform solves for both contractors and owners.

BENEFITS OF myTrack FOR CONTRACTOR TIMEKEEPERS

- **Eliminates Manual Calculations & Contract Interpretation**

Problem: Owners need efficient operations, and contractors want to reduce costs. Manual calculations and complex contract interpretations can be time-consuming and error prone.

Solution: myTrack automates and streamlines these processes, saving time and reducing errors, achieving a world where owners and contractors are on the same page.

- **Automates Data Accuracy & Transparency**

Problem: Owners require accurate data, and contractors need transparency. Reactive audits can be disruptive and time-consuming.

Solution: myTrack offers a self-auditing solution that always ensures accuracy and compliance, benefiting both parties.

- **Provides Real-Time Safety Monitoring & Visibility for Headcount**

Problem: Safety is critical and often an owner's number one priority. Ensuring safety through an accurate headcount can be challenging for contractors.

Solution: myTrack provides real-time visibility into employee attendance, manpower management, qualified skill reporting, fatigue monitoring, crew mix, and supervision ratios, all of which enhance safety at job sites.

- **Reduces Reconciliation & Disputes**

Problem: Handling disputes related to hours worked, subsequent invoicing, and reconciling conflicting records between contractors and owners can be time-consuming and strain relationships—in addition to potentially impacting critical project timelines.

Solution: myTrack prevents disputes by providing clear and accurate data tracking. This fosters stronger owner-contractor relationships.

- **Improves Billing & Cash Flow with Invoice-Ready Billing**

Problem: Timely and accurate billing is essential for both owners and contractors. Billing delays and inaccuracies can affect cash flow for both parties.

Solution: myTrack streamlines billing with accurate and approved data, improving cash flow for contractors and ensuring timely payments by owners.

- **Seamlessly Integrates with Existing Systems**

Problem: Manual data entry into payroll and accounting systems is time-consuming as systems don't always integrate seamlessly.

Solution. myTrack offers a Contractor API for easy integration with existing payroll and accounting systems, reducing errors and manual work.

- **Enhances Project & Employee Accountability**

Problem: Owners require project accountability. For contractors, ensuring employee accountability can be challenging without accurate tracking.

Solution: myTrack captures employee activities and time, promoting accountability and a safer work environment.

- **Customizes Reporting for Informed Decision-Making**

Problem: Owners and contractors need access to relevant data for decision-making. Limited access to customized data can hinder decision-making for both parties.

Solution: myTrack offers a suite of standard reports, as well as self-service custom reports. Access the data you need to make informed decisions and drive efficiency.

IMPROVE THE OWNER-CONTRACTOR RELATIONSHIP

myTrack offers a win-win solution for both owners and contractors in virtually any industry. Contractor timekeepers who embrace myTrack can become champions for efficiency, accuracy, and collaboration. Owners will benefit from a collaborative environment for smoother project execution, cost savings, and stronger contractor relationships.
