

TrackIt

Streamline Deliveries With Fleet Telematics,
Driver Performance And Truck Monitoring

Deliver On Customer Promises

Map the location of trucks in real time while drivers leverage in-app guidance for easier navigation of unfamiliar sites. Track begin pour, end of pour, loading, loaded, and wash statuses. And with accurate ETAs based on traffic conditions along the route, you gain a competitive advantage by ensuring materials are delivered timely – and as promised.

Get Paid Faster

The added efficiency you get with TrackIt for your delivery processes leads to decreases in transportation costs while moving deliveries into billing so you can get paid that much quicker.

TrackIt allowed us to schedule our workload and accurately predict when a truck would arrive on a job site or return to the plant. It more than paid for itself within the first year of use.

TrackIt

Minimize Vehicle Downtime

Put engine data to use and empower proactive scheduling of maintenance. TrackIt offers the tools your fleet managers need to continuously monitor the health and safety of fleet assets and keep vehicles on the road. Evaluate engine diagnostics, fuel consumption, and driver behavior to uncover opportunities to further contain costs while staying productive.

Seamless Compliance

Ensure FMCSA regulatory standards and driver compliance requirements are met using TrackIt's Electronic Log Device (ELD) for capturing pre- and post-trip details.

Flexible Device Options

Prefer to use your own devices? No problem. With TrackIt you have the option to provide your own devices – or if you'd rather have Command Alkon provide tablets, we got you covered either way. Ask us about Basic or Premium Android devices.

Unlimited Potential

Only TrackIt gives you flexibility to scale as your business grows combined with the reliability and security of operating in the cloud. Your potential is unlimited.

Insights That Matter

KPI dashboards help visualize how the overall day is trending, so you can easily review and adjust allocations on-the-fly.
