

Material Supply

Seamless Supply Automation for Producers

Deliver on Customer Commitments with Better Raw Materials Management

Material Supply Can Help

Better anticipate and maximize the utility of every hauler, every truck. Now you can be more responsive and meet, or exceed, customer expectations. Improved visibility to real-time materials consumption, future demand, and incoming shipments makes it possible.

Turn Production Pains Into Efficiency Gains

Eliminate manual tasks and human errors when you introduce automated data capture with pre-filled forms giving you real-time inventory visibility, proactive alerts, and no more stockouts.

Material Supply automates your production workflows in a way that's predictable, accurate, and repeatable. Now you can say goodbye to inventory and production headaches, and hello to seamless material management.

**Reduce Stockouts
and Limit Sale Losses**

**Free Cash Tied Up In
Excess Inventory**

**Deliver On Customer
Promises**

**Stop Chasing
Suppliers**

**Save Transportation
Costs**

Material Supply

Repeatable Accuracy

Designed to enhance operational efficiency and data accuracy, Material Supply is ideal for producers who want to take charge of their inventory and supply chain management workflows, here's how:

- **Smart Data Capture:** Ticket capture using the convenience and speed of a mobile scan enables you to process load data in a snap.
- **Seamless COMMANDbatch Updates:** Say goodbye to delays and hello to predictability. Seamless updates and shared Command Cloud tickets are possible with less manual data entry at the end of the day. Ensure data is updated and stock levels are accurate for order capacity planning.
- **Ticket Automation:** Know precisely what you have on hand with digital ticket receipts from your suppliers.
- **Demand Monitoring:** A centralized view of all plants enables you to track inventory, forecast, demand, and shipments at once.
- **Inventory Management:** Helps you avoid stockout situations and better meet customer demand
- **Optional Invoice Reconciliation Add-on:** Painless, automated invoice reconciliation means no more data matching headaches.

Amplify Sales. Alleviate Stress.

Tired of manually tracking your inventory? Automated inventory management helps monitor exact stock levels, streamlines material flows for next-day deliveries, and helps you make informed decisions with hauling coordination.

- ✓ Stockouts can become a thing of the past. Control inventory levels and reduce costs associated with holding excess stock.
- ✓ Ditch the hauler coordination headaches and stay focused on optimizing production.

Bringing Together People and Technology to Advance the Heavy Building Materials Industry
