New Release!

AI Translation

NovoEd AI translation enables course participants to translate lesson content and peer activity into any supported language.

AI Translation Features

Translations are AI-generated, automating the manual tasks required to make content available in different languages.

Course content is automatically and accurately translated in seconds.

Support for 20+ languages

**Translates both course and user-generated content**

Easily switch between any supported language

Translations are updated in real time as course updates

Course builders and admins can preview translations from learner view

Key Benefits

> "Companies can now scale their global learning initiatives faster, easier, and more affordably with AI Translation."

- Farnaz Ronaghi, Cofounder & CTO, NovoEd

Reduce costs

Skip manual translation costs and reduce overhead of managing translation projects so that these resources can be applied to other learning initiatives.

Keep everything in sync

Automatically addresses updates for translated content and translates new content on the fly.

Faster delivery for new courses and updates

Avoid delays between delivery and completion of new or updated learning content.

Create cohorts with peer learning across languages

Learners using different languages can communicate and collaborate with peers seamlessly.
