

Cohort-Based Learning at Scale

Whether we realize it or not, learning is both social and deeply personal in nature. Strategic capabilities — the ones that truly set an organization apart — must be learned together and acquired through experience. Knowledge shifts perspective, tests long-held beliefs, and inspires growth when debated, reflected upon, and shared. What if we could give everyone an ideal environment for such learning? Unleash impact at the intersection of perspective, application, and expertise?

Where brilliance emerges

NovoEd's deep capability-building platform helps enterprises accelerate their business-critical training initiatives with engaging learning experiences that develop complex skills, enable collaboration and promote inclusion — at scale.

Built upon on the neurological science of learning, the NovoEd platform can:

Deliver streamlined, cohesive learning experiences across the organization

Help your organization develop the capabilities it needs to innovate

Facilitate hybrid learning, wherever your learners are

Provide learners with immediate, real-world application

Demonstrate business impact with meaningful data

Cohort-based learning experiences at scale

Visit www.novoed.com to learn more about our tailored learning experiences
