DISCUSSION & FEEDBACK

to enhance learning by sharing perspective with peers and experts

TEAM-BASED LEARNING

that mirrors how work happens and develops interpersonal skills

MENTORS & MANAGERS

to support learning with experience and wisdom

CURATED & GOAL-ALIGNED CONTENT

that connects business and learning goals

EFFECTIVE FACILITATORS

who guide learners through high-quality experiences that result in impact

Spotlight on Product Capabilities

Have you experienced these capabilities yet?

LEARNING JOURNEYS enables the creation of pathways in NovoEd and advances learning from a one-off learning experience to a continuous journey.

DISCOVERY makes the platform a front door for self-guided learning that can be deployed at scale for upskilling and onboarding. While NovoEd is designed for cohort-based learning, self-guided learning can also occur in the platform.

VIDEO PRACTICE enables learners to rehearse real-world scenarios that drive deep-learning skills directly in and outside of a program.

MENTORSHIP provides your mentor/manager team members with dedicated dashboards where they can monitor learner progress and evaluate, approve, or comment on submitted work.

SKILLS TAGGING explicitly connects learning to the underlying skills that this learning develops and harnesses the power of skills taxonomies to make workforce planning more intentional.

ANALYTICS dashboard builder provides insights into every program, from individual and team activity to assignment-specific data including completion, engagement, and performance.

INTEGRATIONS make the platform compatible with Microsoft Teams, Zoom, Saba, SumTotal, Degreed, Microsoft 365 Calendar, Google Calendar, Salesforce and more!
