AFL's appreciation for the important role technology plays in education is the result of years of experience and performance through consistent partnerships with colleges and universities. We have implemented projects for school districts and universities of all sizes across the country, and will work with you to assess your network infrastructure needs.

As your value-added partner, AFL can tailor services to meet the unique needs and financial means of a large state university or a small liberal arts college. AFL offers consulting and technology strategy development including curriculum integration, virtual university, mobile and distance program delivery and much more.
