Site audible, redundant communications
Back-up power

Whether you require simple surveillance recording, comprehensive integration, or remote interactive monitoring, AFL is your resource for end-to-end security system solutions. We provide turnkey project installation and service through a single source, eliminating the added hassle of dealing with multiple vendors.

AFL's expertise includes video surveillance, access control, intrusion detection, and real-time virtual support, such as virtual guard, virtual doorman, and virtual escort. AFL has strong experience with 100% IP-based systems that lower cost and improve network flexibility and scalability, all tailored to meet the demands of your environment.
