Wireless technology increases productivity in your office, improves customer satisfaction and provides a convenience that people have come to expect. AFL will help you discover the ideal design, installation, and implementation plan for your business needs wherever you are in the contiguous 48 states.

In addition to providing you with excellent wireless technology, we aspire to raise standards for WiFi in public access, public works, and public safety applications. By offering end-to-end solutions and our network expertise, we can guide you to the right products, coverage-area and deployment configuration to help you make smart, informed, and sustainable decisions about your wireless networks.
