

HEALTHCARE

ENVIRONMENTS

- Hospitals
- Medical Campuses
- Long-term Care Facilities
- Outpatient Clinics
- Surgical Centers
- Physicians' Offices

CAPABILITIES

- Structured Cabling
- Intelligent Buildings
- Distributed Antenna Systems (DAS)
- In-building Wireless Infrastructure
- Regulatory Compliance
- WiFi and Access Point Installation
- Security and Safety Systems
- IP-based Physical Security
- Access Control
- Paging and Medical Emergency Notification Systems
- 24/7 Professional Support

Today's Healthcare Industry requires state-of-the-art amenities and equipment for preventative care, patient health management, and emergency treatment. Cultural, regulatory, and technological forces have made healthcare a leading-edge industry with respect to information technology systems. From HIPPA and electronic health records to the HITECH Act and high-resolution file transfer, IT systems in healthcare facilities are being pushed to their limits.

Selecting a network services partner is critical to deploying a successful healthcare solution. AFL not only provides the expertise in end-to-end network solutions, but our technicians are highly qualified in healthcare network installations and overcoming the common obstacles that may arise.
