

## PROJECT SNAPSHOT

# SWAGE360® TRAINING AND SUPPORT

ANY LOCATION U.S.

## AFL SUBSTATION SOLUTION

AFL is the only U.S. substation manufacturer with a full line of bolted, welded, compression and swage accessories.

## TRAINING SCOPE

- Free, on-site training and support
- Virtual training also available
- Four free weeks of tooling rentals with a purchase of Swage360 fittings exceeding \$15,000
- Swage360 Tooling and Accessories available to rent with two weeks' notice
- Tooling repairs offered throughout the warranty
- No AFL travel limit for training
- Overview of the project
- Summary of the various tools and accessories to be used during the installation
- Demonstration of tooling utilities and maintenance requirements
- Match die sizes with appropriate fittings
- Assist in installation completion

For more than 100 years, AFL's engineers have designed standard and custom Swage360® fittings for substations across the United States. The 360 degrees of radial compression makes installation faster and more efficient.

Onsite training and support comes with our Swage360 products and our engineering and customer support teams are available to answer any questions via phone, email or in the field.

"AFL has every fitting that you could want plus the quality is great. However, what makes them stand apart from everyone else is their great customer service. They are very responsive and don't just provide answers, but they look for solutions," comments a project manager at DIS-TRAN Packaged Substations. DIS-TRAN is an AFL customer and has purchased Swage360 products for almost seven years.
