

## TRANSACTION MONITORING WEB CONSOLE

### Fraud Management Made Easy

**Forget the complexity of antiquated fraud management platforms. With Appgate's Transaction Monitoring Web Console, you can access your data quickly, securely, and with ease.**

Simplifies your overall approach to fraud management with an easy to access web console that doesn't require you to download any additional software.

#### Simple - Intuitive - Convenient

##### Ease of access

The console removes technical barriers with no requirement to download additional software. All you need is an Internet connection and compatible browser.

##### Secure access

Rest assured that you're accessing transactional data in a safe environment designed for your Financial Institution. The web console provides a more secure experience as opposed to legacy systems that must be downloaded and are potentially vulnerable to malware.

##### Improved used experience

Modern framework provides an easy to navigate interface, making it effortless to find exactly what you're looking for.

##### Real time data in real time

Enables you to quickly access data, alerts, and transactional activity when you need it most.

#### BENEFITS:

Simple, clean user interface

No download necessary

Easy to access and navigate with an intuitive, user-friendly layout

Compatible with most browsers

Flexible data integration

#### Web Console Features

##### MANAGE USER ROLES & ALERTING

Add and update user access policies and alerts to ensure everyone has access to the necessary resources according to their role.

##### INTEGRATED CASE MANAGEMENT & DASHBOARD

Unify the fraud investigation process and generate full reports from within the Transaction Monitoring Web Console. A customizable dashboard provides an instant view of all unusual activity with constantly updated statistics and charts.

##### CREATE POWERFUL RULES

A robust rule creation engine allows you to easily find and stop previously seen fraud attacks and focus investigative resources where they are most needed to block new threats.

##### FLEXIBLE REPORTING

Transactional data is readily available with various reporting options and the flexibility to export information as needed.
