

# Capitalize on your data while saving time with Andi

## CentrixPIQS with Andi®

Centrix Solutions now offers Andi, Q2's virtual advisor for coaching and actionable insights, in CentrixPIQS. Out of the box, Andi enables more efficiencies in transaction risk management in the back office and facilitates more informed ACH reporting and compliance decisions.

## What can you expect?

Expect back-office operations to run more smoothly with Andi walking you through your daily ACH processing. Andi will "see" every data activity related to CentrixPIQS and offer in-the-moment notifications and guidance to empower better decisions.

### As part of the base product, Andi will:

- Call out overrides
- Show originators exceeding their limits
- Help balance files before you or your staff create output
- Complete routine tasks
- Save time and reduce manual errors
- Free you and your staff to work on other important projects

## Get more from CentrixPIQS

The Centrix Payments I.Q. System (CentrixPIQS™) is a powerful tool for streamlining and automating ACH operations. It allows FIs to easily process ACH transactions, perform ACH file validation, and automate risk reporting. FIs using manual procedures for ACH risk reviews and audits will appreciate the way CentrixPIQS simply provides a holistic view of the risk posed by commercial clients.

**As part of the automated reporting module, Andi will monitor your data and notify you when action is needed:**

- Originators exceeding return thresholds
- Companies with limits that are not using a service
- Changes associated with a customer that might warrant a risk level change

## Prerequisites

- Their CentrixPIQS solution must be hosted in the Q2 datacenter
- The minimum version of CentrixPIQS for use of Andi is 7.8.9

Centrix Solutions, a Q2 company, provides financial institutions with a product line that encompasses treasury management, compliance and risk management, and banking operations.

Centrix provides clients with a broad array of strategic technology solutions. Our team of professionals provides in-depth knowledge and vast amounts of experience developing, delivering, and supporting quality products within the financial industry.
