

# Introducing Q2 Console— Our Newest Unified, Back Office Solution

Back office activity is getting easier, thanks to Q2 Console. Our new unified back office solution allows FI employees to log into a single web-based portal and access multiple Q2 apps without having to re-enter login information. And with near-real-time data visualization capabilities, your FI gets a more accurate and holistic viewpoint of digital channel events and engagement. With a single Okta-based sign-on and integrated web-based experience, it's now easier than ever to navigate less screens and better manage your workflows.

# Q2 Console in Action

Single sign-on allows employees to access Q2 SMART, Exact/TMS, Q2 Co-Pilot, and other FI-facing tools from one login screen, reducing the need to remember multiple login credentials.

Q2 Console features near-real-time Digital Banking Performance Data, allowing digital channel leaders to better understand how account holders are engaging with the digital channel.

User Management workflows include the ability to create and manage customers, users, and logins, as well as create Exact/TMS customers.

**Simple. Looks nice. Very pleasing. Fast and easy to figure out what you're doing next. Great workflow.**

– Regarding Console's User management's consolidated add state.

## Why Q2?

Q2 is a financial experience company headquartered in Austin, Texas. As a key partner to financial institutions, fintechs, and other financial services providers, we empower them to be ever-present companions on their customers' financial journeys—helping them unlock new opportunities, increase efficiency, and grow their businesses in innovative ways.

**If you're an existing Q2 customer, simply contact your Relationship Manager to get involved with Q2 Console. Not a Q2 digital banking customer yet? Let's chat—call 1-833-444-3469 or email [info@Q2.com](mailto:info@Q2.com).**
