Q2 CardSwap

Earn interchange for Amazon, Spotify, Uber*, and more. Q2 CardSwap™ allows users to automatically apply new debit or credit card information across their favorite subscription and digital point of sale services in a single, elegant workflow.

Users enter their card info and login credentials for their subscription services, and the new preferred payment information is automatically tested and applied in real time across multiple services.

Once a user completes the process, they've put your card top of wallet for some of their most valued vendors—expanding their engagement with you and positioning you to benefit from valuable interchange revenue.

- 
1 User enters card info and subscription login.
- 
2 Automatic testing of user's new payment method.
- 
3 Card info is distributed across selected subscription services.
- 
4 Your card is now top of wallet, earning interchange revenue.
