

# Savings Spotlight: Large, multi-state plan realizes significant savings in a complex environment

A large health plan operating in multiple states optimized its payment integrity program by performing edits at strategic intervention points along the prepay-to-postpay continuum. This environment is layered in complexity, and the plan relied on multiple claims editing systems for success, including an in-house solution and customized code edits. For improved success, the plan enlisted the help of Cotiviti as a third-party expert, relying upon Cotiviti's comprehensive, flexible Payment Policy Management solution.

Cotiviti partnered with the plan to develop a highly customized library of policies over time—policies that have had to align with internal administrative guidelines and contracts to reduce provider abrasion. As a result of this bolstered policy library, the plan has realized significant per member, per year savings, even when accounting for operational complexity.

## Key savings\*

- 1.35%** net incremental savings rate
- \$28** per member per year (PMPY) savings across combined membership
- \$31** PMPY savings in Medicare Advantage

## Key benefits experienced

- Increased prepay savings by avoiding improper claims payment
- Improved accuracy of appropriate provider payments
- Reduced provider abrasion

## Key Cotiviti differentiators

- Exceptional incremental cost savings
- Strong understanding of business needs
- Improved accuracy of appropriate provider payments

\*Based on Cotiviti client-accepted savings reported in 2020
