

# Health Enablement

Strengthen health outcomes with connected risk adjustment, quality improvement, and engagement solutions

The ultimate goal for every health plan is to deliver better care for members. But with numerous departments like member relations, quality improvement, and risk adjustment often operating in their own silos, teams may find it difficult to gain access to critical data that drives better outcomes. And even with that data in place, plans struggle to cut through the noise and reach their members with timely messages that can improve their health.

**Cotiviti's Health Enablement solutions allow payers to support more effective healthcare delivery through a portfolio of tools that impact health outcomes positively.** Our solutions drive informed decisions, enhance collaboration within health plans, provider networks, and directly with members. By leveraging our tools, health plans can empower better risk adjustment and quality program performance, uncover valuable insights about member needs and behavior, deliver appropriate resources and tailored interventions, and motivate members to act.

Whether you need support closing care gaps to drive better HEDIS® and Star Ratings results, more accurate population risk data to improve risk score accuracy, or tailored multi-channel outreach to reach members where they are and assist with health accountability across every point of contact, Cotiviti's Health Enablement solutions enable health plans of all sizes to achieve results that matter.

## Key components

- **Quality and Stars:** Measure, analyze, and improve performance across HEDIS®, Star Ratings, state measures and more
- **Risk Adjustment:** Identify your population risk to drive better care
- **Engagement:** Drive action and improve health activation with better member and provider engagement

## Key results

- >147M members reported to NCQA are processed by Quality Intelligence
- >\$2B average appropriate incremental risk adjustment revenue delivered to clients annually
- 83% of members engaged found outreaches helpful

## Key Cotiviti differentiators

- Integrated quality improvement and engagement
- Over 25 years of experience working with national, regional, and local health plans
- Creator of DxCG® risk scores, the gold standard in risk assessment
- Highly-trained AAPC- or AHIMA-certified coders

HEDIS® is a registered trademark of the National Committee for Quality Assurance.
